

How Does My Child Log into Their Student Account at Home to Post to Their Portfolio?

In the event of a class bubble having to close due to a positive Coronavirus case, home learning will be set using the Class Dojo app. Over the coming days we will be sending home the QR codes required for your child to activate their account.

If you do not have access to a smartphone with camera or a webcam you can also activate your child's account using an individual code which will be sent to you via the Class Dojo messages next week.

Your child can log into their student account at home using any of the login methods below. Once they are signed in, they will stay in until they log out.

For devices with a camera:

Using an individual QR code sent by your child's teacher:

Navigate to the ClassDojo student website at dojo.me

Select "Scan QR Code"

Hold up the QR code in front of your computer's camera until the QR reader has successfully read the code

Using a unique link sent by the teacher:

1. Find your child's unique login link in the home login instructions sent by their teacher
2. Copy and paste the link into a browser to open their student account.
