

Why is it important to learn science?

- To enable us to have awe and wonder about the world.
- To understand the world around us.
- It makes us more observant.
- It allows us to analyse and solve problems
- It allows us to invent
- We learn how to be a critical thinker

*Successful
Scientist*

Career Ideas

- Scientist
- Researcher
- Doctor / nurse
- Pharmacist
- Vet
- Conservationist
- Explorer
- Food production
- Analyst
- Astronaut
- Forensic scientist
- Meteorologist
- Microbiologist
- Teacher
- Environmentalist
- Zoologist

Knowledge of different scientists and the impact they have had on the world

Awe and wonder about the world

Explore and use scientific vocabulary precisely

Work Scientifically

- Knowledge
- Ask questions
- Observing and measuring
- Fair testing and predictions
- Comparing and classifying
- Drawing conclusions and giving explanations

Investigate and Problem Solve

- Collect data
- Present information
- Analyse data and results
- Combine Science with Maths skills
